The weather and traffic stations on XM Satellite Radio are wonderful and should not be stopped. When you need updated information fast and reliable, those channels are a click away. With other radio stations you have to wait around until the traffic or weather reports come on, but with satellite radio you just have to click on the station! DON'T GET RID OF "XM INSTANT TRAFFIC AND WEATHER CHANNELS" JUST BECAUSE NAB AND THEIR FOLLOWERS CAN'T IMPROVE THEIR BROADCASTING STATIONS!!!
